

**City of Oroville**  
 Census Block Group Population

The colored areas in this map represent Census Block Groups in Oroville. The numbers represent the total population in each Block Group. You can use this map to show the City Council how you'd like the new districts to be drawn. Add the numbers in the Block Groups to determine the population in the districts you create. Remember, each district should have roughly 3,121 people in it!

Please use a thick pen or marker to draw where you would like the districts to be located. Then, email your map to [districting@CityofOroville.org](mailto:districting@CityofOroville.org), drop your map off at City Hall, or bring it to a public hearing. Please submit your map by 2/14/2020 to be considered for the draft map!
