NEW FIRE PERMIT FEES EFFECTIVE JANUARY 6, 2009

The Oroville City Council adopted Resolution 7221 at the November 4, 2008 Council meeting. This resolution adopted fees associated to State required Fire permits. These fees become effective 60 days after adoption.

Attached is the new fee schedule.

Section A pertains to permits required for construction projects.

Fire permits for construction must be obtained prior to the issuance of the Building Permit unless approved by the Oroville Fire Department.

Section B pertains to Annual or Operational Fire Permits.

The State Fire Code requires businesses that involve large numbers of occupants, handle hazardous materials or temporary installations to obtain a permit to operate. A business must renew the permit on an annual basis. See the attached list of businesses requiring annual permits.

Section C pertains to miscellaneous permits.

These fees contained in this section pertain mostly to cost recovery for services performed by the Fire Department.
